PROFESSIONAL SUMMARY

B.Sc. in Information Technology graduate from Maejo University (First-Class Honours, GPA 3.70) with hands-on experience in Java, Spring Boot, and software architecture. Proven track record in software development through a cooperative education program at MFEC, delivering full-stack systems and customized solutions. Strong in OOP, Design Patterns, SQL (MySQL, PostgreSQL), and GitHub, with a focus on clean, maintainable coding and collaborative problem-solving in Agile environments.

EDUCATION

Jul 2022 – Mar 2026	B.Sc. in Information Technology, Maejo University First-Class Honours GPA 3.70	Chiang Mai, Thailand
May 2016 – Mar 2022	Science–Math Program, Chalermkwansatree School GPA 3.23	Phitsanulok, Thailand

EXPERIENCE

Nov 2025 – Mar 2026	Fullstack Developer Intern, MFEC Co., Ltd. - Developed an internal workforce management system that streamlined employee reallocation across teams, reducing manual coordination effort for PE and team leads. - Designed and consumed RESTful APIs integrating frontend workflows with a Supabase PostgreSQL backend, modeling relational schemas in SQL for reporting and operations. - Collaborated closely with consultants and stakeholders during User Acceptance Testing (UAT) and worked in an Agile/Scrum team through sprint planning, standups, and code reviews.	Bangkok, Thailand
Jun 2023 – Oct 2025	Teaching Assistant, Maejo University Mentored students across 3 courses (Java OOP, Golang, and Web Development with HTML/CSS/JavaScript) on core concepts, debugging, and clean-code practices.	Chiang Mai, Thailand

PROJECTS

Nov 2025 – Mar 2026	Employee Evaluation & Workforce Allocation System <i>Appsmith (Low-Code), Supabase PostgreSQL, RESTful APIs</i> - Built an internal employee-evaluation and workforce-allocation tool with Appsmith (low-code), a Supabase PostgreSQL backend, and RESTful APIs. - Designed a skill-matching mechanism that identifies underutilized staff with the right competencies and reallocates them to support high-workload departments, balancing effort across teams.	Full stack Developer Internship
Nov 2024 – Oct 2025	WhatToWear Website – Match Style for you <i>RESTful APIs, AI Image Recognition (CNN Xception), Spring MVC</i> - Developed an end-to-end web app for customized outfit suggestions, integrating an AI image-recognition API (CNN Xception) to auto-classify garments and remove manual data entry. - Implemented a rule-based matching engine across 3 style categories (Casual, Semi-Formal, Formal), backed by MySQL and Spring MVC.	Full stack Developer

TECHNICAL SKILLS

Hard Skills	Soft Skills
- Languages: Java, JavaScript, Python, Golang - Backend: Spring Boot, Spring MVC, RESTful APIs, OOP, Design Patterns - Frontend: HTML, CSS, React.js, React + Vite, Node.js - Databases: SQL, MySQL, PostgreSQL (Supabase), Oracle - Tools: Maven, Git/GitHub, Docker, Agile/Scrum, UAT, Figma, Google Stich, Appsmith (Low-Code), CI/CD (Vercel) - AI Coding Assistants: Claude Code, ChatGPT, Gemini	- Problem-Solving - Communication Skills - Teamwork & Collaboration - Analytical Thinking - Adaptability - Time Management - Attention to Detail - Knowledge Transfer - Willingness to Learn - Eager to Learn

TRAINING ACTIVITIES

- Agile Frameworks and Practices training; 2 developer workshops in n8n for AI Automation and Flutter App.
- Budget Management Officer, Faculty of Science Student Club (2024 to 2025).
